

FEBRUARY 28TH – 29TH, 2020 TEXAS ACADEMY OF SCIENCE 123RD ANNUAL MEETING

Stephen F. Austin State University, Nacogdoches, TX

The 123rd TAS annual meeting will hold a special symposium focusing on two ecoregions of Texas, the Tamaulipan thornscrub and the Trans-Pecos. This symposium will highlight the unique ecology of these regions and the challenges in their conservation. These challenges include profound urban development, hydrological changes, habitat fragmentation and the ecological ramifications of the proposed U.S.-Mexico border wall.

Thank you for supporting the Texas Academy of Science and we look forward to seeing you in Nacogdoches!

Promoting strong science and education in Texas

Tamaulipan Thornscrub
and Trans-Pecos
Symposium

Graduate Student Oral
Presentation
Competition

Special
undergraduate
student awards for
presentations in math
(Amir-Moez Award)
and marine biology
(Sammy Ray Award)

Numerous
undergraduate
awards for posters and
presentations

Keynote presentations
from the 2020
Distinguished Texas
Scientist and
Outstanding Texas
Educator
